SUMMARY

Software engineer and product engineer who builds full-stack products end to end — schema, APIs, dashboards, and interfaces — and contributes beyond implementation into software architecture, Agile engineering process, technology roadmaps, and technical handover. Carried assessment, management, and analytics platforms to delivery at Aaruchudar, with MERN-stack and 3D visualization projects documented on GitHub.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Three.js

Backend: Node.js, Express.js, FastAPI, REST APIs

Data: MongoDB, PostgreSQL, SQL, Power BI, Excel

Cloud & Tooling: Docker, Firebase, Git, GitHub, Vercel

Other: Agile methodology, UI/UX, Graphics Design, Computer Hardware, Computer Networks

PROFESSIONAL EXPERIENCE

Software Engineer — Aaruchudar Pvt Ltd

May 2025 – Aug 2026

Joined as Full-Stack Developer & Data Analyst (intern); converted to full-time Software Engineer. Coimbatore, India.

- Contributed to the Human Intelligence Platform (Next.js, React, Node.js, MongoDB, Vercel): frontend architecture, admin portal, and automated certificate-generation workflows.
- Helped carry the company's assessment application toward completion and delivery — functionality, technical implementation, debugging, and product-level improvements.
- Contributed to the management/administration system through to a completed state, covering workflows, implementation, and debugging.
- Built analytics dashboards and reporting workflows with Power BI and custom data pipelines, used to track program and platform activity.
- Worked on introducing a structured Agile methodology, engineering principles, and development standards for the software team.
- Contributed to the company technology roadmap across software and hardware projects, from concept through architecture to implementation.
- Prepared a complete technical handover — repositories, applications, websites, management systems, current status, and ongoing technical work.

PRODUCT & TECHNOLOGY INITIATIVES

Riaura — Product Engineering & Technology (Human Intelligence + Neuroscience)

- Contributed application development, software architecture, and UI/product experience; carried the management platform to completion.
- Took the website to roughly 70% before work was paused by reprioritization; planned Agile methodology, engineering standards, and a software-and-hardware technology roadmap.

Lumivex — Product Development

- Worked across product development, technical implementation, and software engineering; the product was completed and delivered.

PROJECTS

- **Brain — Interactive 3D Neural Mapping Platform:** browser-based 3D brain visualization with neural region mapping, cortex isolation, and real-time interaction (Next.js, React, Three.js / React Three Fiber, TypeScript). Live: www.aaruchudar.com/hi-labs
- **ADRIN:** MERN-stack sports information website with real-time news, event updates, and game schedules.
- **Minimalist Expense Splitter:** MERN-stack group-expense tool with real-time balance calculation and sharing.
- **T-SWEAT:** ad-carrying T-shirt with a movement tracker giving advertisers visibility and engagement insight.

EDUCATION

B.Tech, Computer Science and Business Systems — KIT, Kalaignar Karunanidhi Institute of Technology, Coimbatore 2022 – 2026

HSC — Sindhi Vidyalaya Matric Higher Secondary School, Coimbatore 2020 – 2022

AWARDS

- Startup TN 2024 — Pitch Winner
- Smart India Hackathon 2024 — Waitlisted
- Cryptic Hunt 2023 — Winner · Code Connection 2023 — Winner
- Best Performer of Department, 2023
- NCC 'B' Certificate with A grade, 2024 · NCC Thal Sena Camp Lead, 2024
- SGFI Kabaddi Nationals, 2019

CERTIFICATIONS & WORKSHOPS

- Workshops: IIT Madras (Tech for India), DRDO (Quantum Computing), NCSR (Cybersecurity), SNS Gen AI US (Generative AI), NGI TBI (Microcontrollers)
- Courses: Springboard (Python Programming); Udemy (Advanced HTML & CSS, Python, C, Photoshop CC, Figma)
